

# How to make a painted butterfly-

with Miss Sparkles

You need a piece of paper for your painting. You may like to find a picture of a butterfly, so you can copy the shape of the outline.

Fold the paper in half.

Draw half a butterfly shape. Make sure that the fold is placed in the middle of the butterfly.

Cut around the shape.

Using different colours of acrylic paint place blobs all over the butterfly shape.

Fold the two sides of the butterfly together, and smooth it down with your hand. This can be messy, so make sure you do it on a surface which can be easily cleaned, or thrown away.

Open up your butterfly to see the design which you have made. When it dries you make like to add some details with black paint.
